Digital Human Platform

Create and Animate Your Own Realistic Digital Humans with Generative AI.

DXYnet's AI technology brings Digital Humans (AI Avatar) to life by performing lip-sync animation in broadcast videos generated with text or voice inputs.

The Digital Human Platform is an innovative multimedia solution that brings "AI Avatar" to life by generating lip-sync animation in broadcast videos, enabling high-fidelity and natural interactive experience for users. By training the AI model with specific data from enterprise customers, a real-time virtual assistant can be generated to solve user enquiries and provide personalized services.

Key Features

AI Digital Human Presenter :
From selecting styles and setting up backgrounds to adjusting tones of voice, three simple steps to quickly generate a high-fidelity Digital Human presenter for video broadcasting.

Real-time AI Assistant :
Coupled with real-time conversational chatbots, DYXnet Digital Human provides you with 7x24 AI assistant services.

Appearance and Voice Customization :
You can customize the appearance and voice of your AI Avatar to suit your needs in different scenarios.

Benefit Highlights

Freely Customized for Different Needs and Purposes

Users can freely customize their AI avatars' appearance, voice, tone, background, and speaking speed to fit specific needs and purposes.

Generative AI (AIGC) Personalized Response

By leveraging generative AI technology, DYXnet Digital Human delivers intelligent responses with artificial intelligence-generated content (AIGC). Enterprises can train the model with specific industry data to generate more accurate and personalized user responses, enabling a superior user experience.

Digital Human Production Support

By uploading your videos or voice packs, DYXnet can quickly generate a unique Digital Human that meets your requirements and supports Mandarin, Cantonese, and English language reporting.

Use Cases

Marketing

Companies can use AI Avatar in content marketing to build unique brand images to attract more target audiences.
